[What you'll do...](#)

Senior Manager, Data Science

Agentic AI & Finance Innovation

Walmart US Finance Data & Intelligence is hiring a Senior Manager of Data Science — and we're not looking for someone to build dashboards.

We're building autonomous AI agents that research, reason, and respond — all on behalf of one of the world's largest Finance organizations. Our flagship platform, Midnight AI, is a production-grade, multi-tier agentic system that monitors a shared mailbox, understands requests, orchestrates specialized sub-agents, queries enterprise data systems, and delivers insight-on-demand to Finance leadership — without a human in the loop.

This is real. We need someone to help us push it further.

Why This Role Exists

Our Finance D&I organization is at the absolute forefront of domain-driven AI innovation. We've moved beyond proof-of-concepts — we operate a live agentic platform that partners directly with Finance Leadership to develop next-generation ways of working. We are fundamentally rethinking how a \$650B enterprise makes decisions, and we're doing it by building intelligent systems that compound knowledge over time.

As a Senior Manager, you will help evolve this platform: designing new agents, hardening existing ones, expanding integrations, and ensuring our architecture scales as the organization leans in.

What You'll Actually Be Working On

Agentic Architecture & Platform Development

- **Own and extend** a hierarchical multi-agent system built on Pydantic AI and Claude, featuring:
- Tier 1 — Email Orchestrator: Slim agent handling email I/O, attachment parsing (PDF, DOCX, XLSX with OCR), and response formatting.
- Tier 2 — Analytical Agent: Heavy-lifting research agent with direct access to BigQuery, Confluence, and web search.
- Tier 3 — Specialist Sub-Agents: Power BI (DAX generation & dimensional analysis), Code Analyst (sandboxed Python execution & chart generation), and Forecast Agent (Prophet-based time series).
- **Design and build** new sub-agents as the platform expands into new Finance domains.
- **Evolve** our 40+ AI tools spanning BigQuery, Power BI DAX, Confluence, web browsing, data export, geography mapping, and more.
- **Maintain and improve** our LLM-powered learning system — a feedback loop where the agent extracts knowledge from user interactions and applies it to future responses.

AI-First Development

- This team practices AI-first development — we use AI to build AI. You'll leverage tools like Code Puppy, Claude, and our own platform to accelerate your work.
- **Prompt engineering at scale:** Our agents use a modular prompt architecture with composable modules (identity, workflow, domain knowledge, security, verification checklists).
- **Evaluate and integrate new models:** We route across model tiers (Claude Opus, Sonnet, Haiku) based on task complexity. You'll optimize this strategy as new models emerge.
- **Build with guardrails:** Responsible AI is non-negotiable. You'll establish and enforce guardrails for LLM-generated outputs across Finance workflows.

Finance Domain Partnership

- **Partner directly** with Finance Leadership to identify high-impact automation opportunities across Supply Chain, Operations, Merchandising, and Customer.
- **Translate** complex agentic capabilities into clear value propositions for executive stakeholders — you'll need to speak both "transformer architecture" and "contribution profit."
- **Embed** AI products into enterprise initiatives including Olympus and other transformational platforms.
- **Drive** the shift from manual commentary and ad-hoc analysis to insight-on-demand workflows powered by autonomous agents.

Technical Toolkit

- **AI** — the only thing holding you back is time in your day.
- **Python** (you dream in it) and **SQL** (you query in your sleep).

- **LLM frameworks:** Experience with prompt engineering, tool-use patterns, and agent orchestration.
- **Data platforms:** Experience with BigQuery, Power BI, or comparable enterprise analytics tools is a strong plus.

Domain & Business Insight

- Demonstrated success working at the intersection of data, finance, and operations.
- Comfort partnering with Finance stakeholders on P&L-critical use cases — you can hold your own in a room full of VPs.

Collaboration & Influence

- Strong track record driving cross-functional initiatives with analysts, engineers, and business partners.
- Ability to translate deep technical work into executive-ready narratives.
- You're energized by ambiguity and excited to define the playbook, not just follow one.

Benefits & Location

- Competitive base salary + annual cash bonus + equity.
- 401(k) with company match, comprehensive health coverage, parental leave, and Walmart stock purchase plan.
- Bentonville, AR preferred (hybrid). Remote candidates considered for exceptional fit.

Ready to Build the Future of Finance?

We're not just using AI — we're building autonomous AI systems that partner with Finance Leadership to transform how the world's largest retailer makes decisions. If you've been waiting for a role where you get to architect agentic systems at enterprise scale, work with cutting-edge LLMs in production, and see your work directly impact a \$650B business — this is it.

Apply now. Let's build something extraordinary together.

Walmart US Finance Data & Intelligence — Where agents do the heavy lifting so humans can focus on the decisions that matter.

At Walmart, we offer competitive pay as well as performance-based bonus awards and other great benefits for a happier mind, body, and wallet. Health benefits include medical, vision and dental coverage. Financial benefits include 401(k), stock purchase and company-paid life insurance. Paid time off benefits include PTO (including sick leave), parental leave, family care leave, bereavement, jury duty, and voting. Other benefits include short-term and long-term disability, company discounts, Military Leave Pay, adoption and surrogacy expense reimbursement, and more.

You will also receive PTO and/or PPTO that can be used for vacation, sick leave, holidays, or other purposes. The amount you receive depends on your job classification and length of employment. It will meet or exceed the requirements of paid sick leave laws, where applicable.

For information about PTO, see <https://one.walmart.com/notices>.

Live Better U is a Walmart-paid education benefit program for full-time and part-time associates in Walmart and Sam's Club facilities. Programs range from high school completion to bachelor's degrees, including English

Language Learning and short-form certificates. Tuition, books, and fees are completely paid for by Walmart.

Eligibility requirements apply to some benefits and may depend on your job classification and length of employment. Benefits are subject to change and may be subject to a specific plan or program terms.

For information about benefits and eligibility, see [One.Walmart](#).

The annual salary range for this position is \$110,000.00 - \$220,000.00

Additional compensation includes annual or quarterly performance bonuses.

Additional compensation for certain positions may also include :

- Stock

Minimum Qualifications...

Outlined below are the required minimum qualifications for this position. If none are listed, there are no minimum qualifications.

Option 1: Bachelors degree in Statistics, Economics, Analytics, Mathematics, Computer Science, Information Technology or related field and 5 years' experience in an analytics related field. Option 2: Masters degree in Statistics, Economics, Analytics, Mathematics, Computer Science, Information Technology or related field and 3 years' experience in an analytics related field. Option 3: 7 years' experience in an analytics or related field.

Preferred Qualifications...

Outlined below are the optional preferred qualifications for this position. If none are listed, there are no preferred qualifications.

Data science, machine learning, optimization models, PhD in Machine Learning, Computer Science, Information Technology, Operations Research, Statistics, Applied Mathematics, Econometrics, Successful completion of one or more assessments in Python, Spark, Scala, or R, Supervisory experience, Using open source frameworks (for example, scikit learn, tensorflow, torch), We value candidates with a background in creating inclusive digital experiences, demonstrating knowledge in implementing Web Content Accessibility Guidelines (WCAG) 2.2 AA standards, assistive technologies, and integrating digital accessibility seamlessly. The ideal candidate would have knowledge of accessibility best practices and join us as we continue to create accessible products and services following Walmart's accessibility standards and guidelines for supporting an inclusive culture.

Primary Location...

702 Sw 8Th St, Bentonville, AR 72716, United States of America

Walmart and its subsidiaries are committed to maintaining a drug-free workplace and has a no tolerance policy regarding the use of illegal drugs and alcohol on the job. This policy applies to all employees and aims to create a safe and productive work environment.

About Us**About Walmart:**

Fifty years ago, Sam Walton started a single mom-and-pop shop and transformed it into the world's biggest retailer. Since those founding days, one thing has remained consistent: our commitment to helping our customers save money so they can live better. Today, we're reinventing the shopping experience and our associates are at
