

(USA) Principal, Systems and Infrastructure Engineer, Information Security

[Apply](#) Denver, CO Full time Posted 7 Days Ago R-2395804

Position Summary...

Are you driven to design durable, scalable, and well-governed cloud platforms that stand the test of time? Join the Walmart/VIZIO Team as a Principal Cloud Infrastructure & Platform Engineer, where you will lead large-scale multi-cloud migration and modernization efforts across AWS, GCP, and Azure, while shaping infrastructure, automation, security, and FinOps practices in equal measure. This is a highly technical, hands-on principal role for an engineer who sets standards, leads by example, and brings rigor, clarity, and best practices to complex cloud environments.

What you'll do...

About the Team

The Walmart/VIZIO Team is responsible for enabling and operating **secure, scalable, and cost-aware cloud platforms** that support critical business systems. We work across Engineering, Security, Finance, and Platform teams to modernize infrastructure, migrate workloads, enforce governance, and reduce operational risk. Our

mandate is not just to build infrastructure—but to build it *correctly*, with consistency, automation, and long-term sustainability in mind.

This Principal role brings together cloud migration leadership, infrastructure architecture, automation, security remediation, and FinOps enablement into a single senior technical authority.

What You'll Do

Cloud Migration & Architecture Leadership

- Lead the migration and modernization of a large portfolio of applications and databases from **AWS to GCP and Azure**, ensuring reliability, security, and minimal disruption.
- Design target-state architectures and migration patterns that balance scalability, resilience, cost, and operational simplicity.
- Evaluate cloud-native services and guide architectural tradeoffs across AWS, GCP, and Azure.
- Establish reference architectures, landing zone standards, and platform patterns used across the organization.

Infrastructure as Code & Platform Automation

- Architect, build, and maintain **complex, reusable Infrastructure-as-Code solutions** using **Terraform and Terragrunt**.
- Develop Python and Bash automation to support infrastructure lifecycle management, migrations, governance, and operational workflows.
- Drive consistency and quality through shared modules, versioning strategies, and code review standards.
- Integrate IaC and automation into CI/CD pipelines using GitHub Actions and related tooling.

Containers, CI/CD & Modernization

- Drive containerization and platform adoption using **Docker and Kubernetes**, enabling scalable and resilient application deployments.
- Design and maintain robust CI/CD pipelines that support fast, safe, and repeatable infrastructure and application delivery.
- Improve observability, reliability, and operability through automation and standardized tooling.

Security, Compliance & Governance (SecOps)

- Build automation and guardrails to remediate security findings and enforce configuration baselines across all cloud providers.
- Partner closely with Security teams to embed security best practices into IaC, pipelines, and platform standards.
- Support continuous compliance through asset discovery, inventory management, and policy validation tooling.

FinOps Enablement (Equal Focus)

- Incorporate cost awareness and financial accountability into infrastructure design, migrations, and automation.
- Support tagging standards, cost allocation models, and usage visibility across AWS, GCP, and Azure.
- Partner with FinOps and Finance teams to ensure infrastructure decisions reflect both technical and financial best practices.

Operational Excellence & Technical Leadership

- Provide hands-on Linux system administration, performance tuning, and troubleshooting when needed.
- Maintain high-quality documentation, runbooks, and architectural decision records.
- Serve as a principal-level mentor and technical leader through design reviews, code reviews, and cross-team collaboration.
- Champion best practices, consistency, and long-term maintainability across all infrastructure efforts.

About You

You are a senior-level engineer with a deep sense of ownership and a passion for building infrastructure **the right way**. You bring:

- Extensive hands-on experience with **AWS**, plus strong experience with **GCP and/or Azure**, ideally in migration scenarios.
- Deep expertise in **Terraform**, including the design of modular, reusable IaC systems; experience with **Terragrunt** is strongly preferred.
- Strong proficiency in **Python and Bash** for automation, tooling, and operational workflows.
- Hands-on experience with **Docker and Kubernetes** in production environments.
- A solid foundation in **Linux system administration**, performance optimization, and troubleshooting.
- Experience designing and maintaining CI/CD pipelines, ideally using **GitHub Actions**.
- A strong understanding of **cloud security principles**, compliance requirements, and SecOps workflows.
- Practical experience incorporating **FinOps principles** into infrastructure and platform design.
- A documentation-first mindset, with a commitment to clarity, accuracy, and discoverability.

- Exceptional attention to detail, organizational skills, and the ability to manage complex, multi-track initiatives.
- Strong communication skills and the ability to influence without authority.
- A passion for mentorship, collaboration, and continuous improvement.

As a Principal Engineer, you will shape how Walmart/VIZIO **builds, migrates, secures, and operates cloud infrastructure** across multiple providers. Your work will define standards, reduce risk, enable teams, and ensure our platforms are scalable, secure, cost-aware, and sustainable for years to come. If you thrive in complex environments and care deeply about engineering excellence, this role offers both influence and impact.

At Walmart, we offer competitive pay as well as performance-based bonus awards and other great benefits for a happier mind, body, and wallet. Health benefits include medical, vision and dental coverage. Financial benefits include 401(k), stock purchase and company-paid life insurance. Paid time off benefits include PTO (including sick leave), parental leave, family care leave, bereavement, jury duty, and voting. Other benefits include short-term and long-term disability, company discounts, Military Leave Pay, adoption and surrogacy expense reimbursement, and more.

You will also receive PTO and/or PPTO that can be used for vacation, sick leave, holidays, or other purposes. The amount you receive depends on your job classification and length of employment. It will meet or exceed the requirements of paid sick leave laws, where applicable.

For information about PTO, see <https://one.walmart.com/notices>.

Live Better U is a Walmart-paid education benefit program for full-time and part-time associates in Walmart and Sam's Club facilities. Programs range from high school completion to bachelor's degrees, including English Language Learning and short-form certificates. Tuition, books, and fees are completely paid for by Walmart.

Eligibility requirements apply to some benefits and may depend on your job classification and length of employment. Benefits are subject to change and may be subject to a specific plan or program terms.

For information about benefits and eligibility, see [One.Walmart](#).

The annual salary range for this position is \$121,000.00 - \$242,000.00

Additional compensation includes annual or quarterly performance bonuses.

Additional compensation for certain positions may also include :

- Stock

Minimum Qualifications...

Outlined below are the required minimum qualifications for this position. If none are listed, there are no minimum qualifications.

Option 1: Bachelor's degree in computer science, information technology, engineering, information systems, cybersecurity, or related area and 5 years' experience in systems and infrastructure engineering or related area at a technology, retail, or data-driven company.

Option 2: 7 years' experience in systems and infrastructure engineering or related area at a technology, retail, or data-driven company.

Preferred Qualifications...

Outlined below are the optional preferred qualifications for this position. If none are listed, there are no preferred qualifications.

Certification in Security+, GISF, CISSP, CCSP, or GSEC, Master's degree in computer science, information technology, engineering, information systems, cybersecurity or related area and 3 years' experience leading information security or cybersecurity projects, We value candidates with a background in creating inclusive digital experiences, demonstrating knowledge in implementing Web Content Accessibility Guidelines (WCAG) 2.2 AA standards, assistive technologies, and integrating digital accessibility seamlessly. The ideal candidate would have knowledge of accessibility best practices and join us as we continue to create accessible products and services following Walmart's accessibility standards and guidelines for supporting an inclusive culture.

Primary Location...

55 Madison St, Denver, CO 80206-5419, United States of America

Walmart and its subsidiaries are committed to maintaining a drug-free workplace and has a no tolerance policy regarding the use of illegal drugs and alcohol on the job. This policy applies to all employees and aims to create a safe and productive work environment.

About Us

About Walmart:

Fifty years ago, Sam Walton started a single mom-and-pop shop and transformed it into the world's biggest retailer. Since those founding days, one thing has remained consistent: our commitment to helping our customers save money so they can live better. Today, we're reinventing the shopping experience and our associates are at
